

CESAB *Tracto*

Tow Tractors and Platform Trucks, 4 – 50 tonnes capacity

Market leading products and local support

- A range of 3-wheel and 4-wheel electric tow tractors and platform trucks
- Towing capacities from 4.0 to 50 tonnes
- Available through your local CESAB dealer

CESAB fully integrated the former Simai product as the **CESAB Tracto** range. This brings together two innovative companies with more than 125 years combined experience. Drawing upon the knowledge gained in the agriculture and industrial machinery sector, Simai became a specialised material handling manufacturer. Today, with the **Tracto** range CESAB offer Europe's widest range of electric tow tractors and platform trucks.

CESAB's philosophy of ongoing research and development to produce a range of products that deliver the highest productivity and safety. Our ISO 9001 accreditation is the testament to our commitment to maintaining the highest quality standards. CESAB's outstanding products are complemented by unmatched service and support. The **Tracto** range benefits from the expertise of CESAB's nationwide network of independent dealerships. CESAB's fully qualified, local engineers will ensure maximum uptime for its customers, whatever their industry. It is a powerful partnership between your business and CESAB. To find out more about the **Tracto** range of tow tractors and platform trucks, contact your local CESAB dealership.

In 2022, CESAB Europe renewed its entire electric counterbalance truck range

The images may show optional equipment or accessories that are not part of the standard version of the truck.

The data in this document has been determined based on our standard test conditions.

Operating performance may vary depending on the actual specification and condition of the truck and the conditions of the area of use.

Availability and specifications are regionally determined and are subject to change without notice. Please contact your authorised CESAB dealer for further information.
